

ProxPass®

Long Range Proximity for Vehicle Access Control

Application

The ProxPass is an active tag specifically designed for vehicle access control. Providing convenient access control for parking and fleet management applications, ProxPass is an ideal augmentation to an existing or new HID proximity installation. It can be encoded with any HID format and numbering system used by HID proximity cards, including the Corporate 1000 format.

Features

- Provides a six to eight foot read range.
- Velcro backing attaches easily to interior of vehicle windshield.
- Attractive, durable sealed case.
- Compatible with MaxiProx® reader and all HID card formats.
- Two to five year battery life, depending on usage.
- Competitively priced as compared to VHF vehicle tags.

Features

Description

RF-programmable, customer specified ID numbers

Options

- External card numbering

Easily administered

A cross-reference list correlating the external card number and the programmed ID number provides easy system administration.

Security

Over 137 billion unique codes available.

Long life

Dual battery design and low current draw allows two to five years with typical usage.

Durability

Rugged, UV-resistant, sonic-welded polycarbonate case is also weather resistant.

Warranty

Lifetime warranty against defects in materials and workmanship (see complete sales policy for details).

Specifications

Typical maximum* read range using MaxiProx® reader

4 feet (1.27 m) to 8 feet (2.5 m)

*Depending on local installation conditions.

Mounting location

Interior windshield, driver's side, upper or lower corner

Note: Ideal mounting location is on interior windshield glass.

Mounting on metal will degrade performance.

Dimensions

3.625" x 2.625" x 0.30"

(9.25cm x 6.75cm x .76cm)

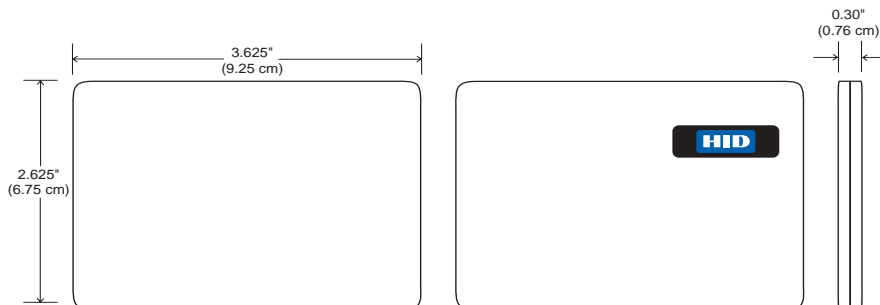

Operating temperature

-22° to 185° F (-30° to +85° C)

Environmental

5 – 95% RH, non-condensing
(Not for marine usage)

(Please see "How to Order" guide for a description of the options and associated part numbers). LIT1351DS 8/02; supercedes 5/00
